Suction and Oxygen Therapy Accessories

As a leader in the medical gas industry, you can rely on BeaconMedæS. Our suction accessories are no exception. Our knowledge, expertise, and service, coupled with leading edge technologies ensures your project is in the right hands.

Our suction regulator and flowmeter accessories are built for demanding environments with the quality and performance you can always expect from BeaconMedæS.

- *Flowmeter accessories are designed to provide you with the most reliable service and to meet any of your needs.*
 - » *Disposable Humidifier*
 - » *Reusable Humidifier*
 - » *Swivels*
 - » *Power Take Off*
 - » *Y-Blocks for DISS wall connections*
 - » *Tubing for flowmeters*
- *Vacuum Regulator accessories ensure you have the latest options to provide reliable service to your patients.*
 - » *Gauges (for replacement or analog to digital upgrades)*
 - » *Vacuum Traps*
 - » *Canister Holders*
 - » *Reusable Canister System*
 - » *Disposable Canisters*
 - » *Roll stands*
 - » *Tubing for regulators*

The BeaconMedæS Series B Outlet Hook Plate supports vacuum regulators and flowmeters without damage to outlets that can cause costly leaks.

3000 CC	2205601923	2205601925	2205601927

Vacuum Regulator Accessories

Vacuum Traps

**Vacuum Regulator
with Trap**

Benefits of using a Vacuum Trap

- Ensures longevity and reliability of the vacuum regulator
- Prevents fluid from being suctioned into the regulator and wall outlet, reducing maintenance and cleaning costs
- Prevents the flow of body fluids, blood and irrigation solutions through vacuum regulators, wall outlets and pipeline systems that could reduce air flow and compromise suction power
- Lowers risk of cross contamination
- Robust traps can be steam sterilized
- Positive shut-off allows suction procedure to be resumed immediately upon replacement of the full trap with a clean, empty one

Series B Outlet Hook Plate

The Problem

In high use areas of the hospital like emergency, and even in standard patient rooms, wires and setup items are often draped over equipment, potentially exposing sterile packages to damage and contamination.

The Perfect Suction and Oxygen Therapy Compliment

The BeaconMedæS Series B Outlet Hook Plate ensures medical gas delivery is never compromised.

Equipped with a retractable hook, the hook plate simplifies set-up of suction regulators and flowmeters without damage to the equipment or outlet for worry-free and dependable service.

The sleek, robust design supports up to 15 pounds.

The hook easily retracts, magnetically staying in place for superior service.

A Simple, Inexpensive Solution
