

## The perfect bedhead solution for your hospital

Looking for a new bedhead solution to answer your modern hospital's needs? BeaconMedaes has the perfect unit for you. Rely on our quality and improve the look of your patient environment with our Bedhead Units.

Enhances the patient environment

Superior quality and strength

Easy to clean and elimination of dust traps

Modular structure

Guarantees 100% compatibility with the in-house system

The BeaconMedaes Bedhead Units offer LED lighting, electrical sockets, nurse call components, monitoring, telephone jacks, and medical gas outlets, all conveniently housed in the aesthetically pleasing powder coated aluminum profile.

Thanks to the modular structure, numerous equipment variants are possible, with or without gas outlets. This makes the bedhead unit the ideal choice for hospitals, clinics, nursing homes, rehabilitation centres, and many other healthcare facilities. The systems can be equipped with nurse call components, sockets and gas outlets from all well-known manufacturers. This guarantees 100% compatibility with the in-house system.

Our sales support team provide expert medical gas design services, and will even help you develop specifications.
