

Flexible Pendant

SPECIFICATION

Flexible pendants

Flexible pendants are intended for use in operating theatres, anaesthetic rooms and similar medical locations. They are an ergonomic solution for the provision of medical gases at the point of use and are intended to overcome trip hazards associated with trailing hoses. Flexible pendants are supplied pressure and leak tested, and comply with the United Kingdom Department of Health (DoH) publications HTM 02-01, HTM 2022, NHS Model Engineering Specification C11.
